PROFESSIONAL SUMMARY

Computer Science undergraduate at Babcock University with hands-on experience in software development, data analytics, and technical communication. I build practical projects using Python, C, SQL, HTML, CSS, and JavaScript while actively contributing to the developer community as a GDG technical writer and peer tutor. Passionate about learning by building, collaborating in teams, and developing software that solves real-world problems, with growing interests in AI and data-driven applications.

EDUCATION

Babcock University

Bachelor of Science (B.Sc.) in Computer Science

Expected Graduation: 2029

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, JavaScript

Web Technologies: HTML5, CSS3, JavaScript (DOM)

Data & Analytics: Excel, MySQL, Power BI

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Cursor

PROJECTS

Portfolio Website | HTML, CSS, JavaScript

- Designed and developed a fully responsive personal portfolio using HTML, CSS and JavaScript.
- Applied responsive design principles to ensure usability across desktop and mobile devices.
- Structured the project using reusable components and version control with Git.

Project Link: [Live Portfolio](#)

Heart Disease Analysis Dashboard | Microsoft Excel, MySQL, Power BI

- Cleaned, organized and transformed datasets using Microsoft Excel and MySQL.
- Designed and developed an interactive dashboard to analyze heart disease data and uncover trends related to patient health.
- Communicated insights through charts, filters and performance metrics to support data-driven decision-making.

Project Repository: [Github Link](#)

Student Record Management System | C

- Developed a console-based student management system in C to store, search, update and organize student records efficiently.

- Applied structured programming concepts, functions, arrays and use-defined data structures to create a maintainable application.
- Implemented CRUD (Create, Read, Update, Delete) operations while strengthening problem-solving and algorithmic thinking.

Project Repository: [Github Link](#)

Football Performance Analytics (In Progress) | Python, Pandas, Jupyter Notebook, soccerdata, FBref

- Developing a football analytics pipeline that retrieves real match and player data to analyze team and individual performance.
- Performing data cleaning, feature engineering and exploratory analysis using Pandas while documenting insights in Jupyter Notebooks.
- Building reusable Python workflows to generate performance metrics and visualizations that support data-driven football analysis.

LEADERSHIP & EXPERIENCE

Course Representative | 2026 - Present

- Represent student interests and coordinate communication between students and faculty.
- Support academic coordination and departmental communication.

Technical Writer for RADAR - GDG On Campus Babcock University | 2026

- Wrote technical articles and educational content for the GDG Babcock community.
- Simplified technical concepts for student readers through clear, engaging writing.

Student Tutor - BUCC | 2026

- Assisted students in understanding core Computer Science concepts through peer tutoring.
- Supported collaborative learning by simplifying technical topics and answering academic questions.

CERTIFICATIONS

Building RAG Agents with LLMs - NVIDIA

Professional Data Analysis - Ideainnovate Africa

Introduction to Data Analysis - Ideainnovate Africa

AI and Career Empowerment - University of Maryland

LEADERSHIP, COMMUNITY & AWARDS

- Google Developer Groups (GDG) Babcock - Technical Writer, Media & Marketing Team
- Babcock University Computer Club (BUCC) - Member and Student Tutor
- Babcock University Students' Entrepreneurship Club (BUSEC) - Welfare Team
- Best JAMB Performance Award (354/400), Babcock University High School
- GDG Babcock - Certificate of Contribution (Orbit 1.0)
- BUCC - Certificate of Service
