github.com/KamdyB | linkedin.com/in/kamdirichukwu-wosu-ezi-850b15380

## PROFILE

Computer Science undergraduate at Babcock University with hands-on experience building web applications, working with data workflows, and explaining technical ideas through writing. Interested in software engineering, data science, AI, and sports analytics. I distinguish working prototypes from finished products and measured outcomes.

## EDUCATION

**Babcock University** B.Sc. Computer Science | Expected graduation: 2029

## SELECTED PROJECTS

**Sinopia** | React, TypeScript, FastAPI, PostgreSQL | Evolving MVP
Built a coaching platform for athlete check-ins, training context, and pain reports. Work spans the interface, API integration, persistence, authentication flows, and deployment. github.com/KamdyB/sinopia

**Football Data Sentinel** | Python, data cleaning, validation
Built a workflow for checking football-related records before analysis. One recorded run retained 551 valid records from 573 raw records; this describes that dataset run only. github.com/KamdyB/football-data-sentinel

**Focus Wall** | React, TypeScript, Vite | In development
Developing a focus-oriented web app for structuring work sessions. github.com/KamdyB/focus-wall

**AFAX-P - The Show That Didnt Happen** | Published interactive story
Created an interactive digital story for AfAX-P 2026: Digital Storytelling for Peacebuilding, distinguishing documented context from reconstructed online material. github.com/KamdyB/afax-story

## LEADERSHIP AND TECHNICAL COMMUNICATION

**RADAR Co-Lead and Technical Writer | GDG Babcock / CS community | 2026-present**
Research and write technology-focused content to make technical ideas clearer for student audiences.

**Computer Science Senator | Babcock University Computer Club | 2026-present**
Represent student perspectives and contribute to student-led coordination and discussion.

**Course Representative | Computer Science, Babcock University | 2026-present**
Help communicate academic updates and processes between classmates and course stakeholders.

## TECHNICAL SKILLS

Languages and data: Python, SQL, pandas, data cleaning and validation
Web and backend: React, TypeScript, Vite, FastAPI, REST APIs, PostgreSQL
Tools: Git, GitHub, Jupyter Notebook
Communication: technical writing, research synthesis, documentation, community coordination

Project descriptions reflect current development status. Links are listed in text for easy copying.
