

WOSU-EZI KAMDIRICHUKWU BLOSSOM

Computer Science Undergraduate | Data Analyst | Python & SQL

+234 816 6442 424 | kamdirichukwuosuezi@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building data analysis and software projects in Python, SQL and C. Experienced in collecting, validating, cleaning and analyzing real-world datasets, with a focus on reproducible workflows and defensive handling of data and program inputs. Builds modular tools and documents technical decisions clearly through project work and technical writing.

EDUCATION

Babcock University

Bachelor of Science (B.Sc.) in Computer Science | Expected Graduation: 2029

- CGPA: 4.65/5.00
- Best JAMB Performance Award (354/400)

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, JavaScript

Libraries & Data: Pandas, soccerdata

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

Core Topics: Data Structures, Algorithms, Probability, Statistical Analysis

PROJECTS

Quantitative Football Analytics Pipeline | Python, Pandas, SQL, soccerdata, FBref

- Built a quantitative football analytics pipeline using soccerdata and FBref to collect, validate and analyse EFL Championship player and match data.
- Implemented reusable statistical metric functions (per-90 normalisation, goal contribution and team metrics) with defensive validation against missing data, schema changes and zero-division.
- Developed SQL scouting queries and a reproducible data-inspection workflow to examine dataset integrity before downstream statistical analysis.
- Emphasized reproducibility by separating data acquisition, validation, reusable metric computation and exploratory analysis into modular components.

GitHub: [Football Analytics Pipeline](#)

Student Record Management System — Linked List Implementation | C

- Implemented a custom singly linked list in C supporting insertion, traversal and search over structured student records.
- Built reusable input-validation utilities to prevent malformed records and explicitly document failure-handling decisions.
- Structured the system for future extensions including deletion, aggregation, iterable interfaces and complexity analysis.

HACKATHONS & COMPETITIONS

C.H.A.T. (Campus Health AI Triage) | BUSEC BIC 6.0 (Top 20) & BUCC Ideathon (Top 10)

- Developed and pitched a health-tech concept for staged emergency triage and hospital/ambulance coordination.

Conduit AI | Harvard HSIL Hackathon (Top 20, Prelim Stage)

- Contributed to a team concept for consolidating patient clinical records across healthcare facilities.

LEADERSHIP & EXPERIENCE

BUCC Senator, Computer Science (200L) | 2026 – Present

- Elected via by-election to represent Computer Science students within the Babcock University Computer Club.

Co-Lead, RADAR — GDG On Campus Babcock University | 2026/2027

- Currently serving as Co-Lead for RADAR, having previously contributed as Technical Writer for the initiative.
- Wrote technical articles and educational content for the GDG Babcock community, simplifying technical concepts for student readers.

Course Representative | 2026 – Present

- Represent student interests and coordinate communication between students and faculty.
- Support academic coordination and departmental communication.

Student Tutor — BUCC | 2026

- Assisted students in understanding core Computer Science concepts through peer tutoring.
- Supported collaborative learning by simplifying technical topics and answering academic questions.

Media Team Member — AI x BIV Summit | 2026

- Volunteered on the media team for the AI x BIV Summit, covering event proceedings and speaker sessions.
- Interviewed Abdallah Alsamani, CEO of SpacePoint AE, as part of summit media coverage.

CERTIFICATIONS

- Building RAG Agents with LLMs — NVIDIA
- Professional Data Analysis — Idealnovate Africa
- Introduction to Data Analysis — Idealnovate Africa
- AI and Career Empowerment — University of Maryland
